

Home Support

Assuming the student's account is functioning properly at school, we recommend the following:

1. Use either a Chromebook or laptop/PC to access Clever (we cannot support the use of tablets at this time). Download the Clever extension on your web browser (Chrome or Firefox only). Search for: "Clever extension for Firefox" or "Clever extension for Chrome" to find the download site. (Or use this link to download the extension here: <https://chrome.google.com/webstore/detail/clever/nopfnnpnopgmcnkjchnlpomggcdjfepe>)
2. Ensure that you are using the Somerset/Somerset Berkley Clever login page (which can be found here: https://clever.com/oauth/authorize?channel=clever&client_id=4c63c1cf623dce82caac&confirmed=true&district_id=5915de12edf22900018fcbde&redirect_uri=https%3A%2F%2Fclever.com%2Fin%2Fauth_callback&response_type=code&state=20ad40791c58d34e08631c4ee8dd18ca575ae62a1b112f736bc1c90805034ffd)
3. For students in grade 3 through 5 - Login to Clever with your child's `##first.last@student.somersetschools.org` account. When typing the Google account information, be sure to include `@student.somersetschools.org`. Otherwise, Google will default to `@gmail.com` (which is not a user account identified in our Clever single sign-on portal)
Be sure to include the student's Year of Graduation in the email address
Example: `33first.last@student.somersetschools.org`
4. For students in K-2, click the option to scan a badge, and scan the QR code badge your student's teacher has provided.
5. Once students are logged into Clever, icons for the district programs will appear on their dashboard. To log into these programs, such as Lexia and Reflex, students will click the program's icon, and Clever will log them in automatically.

If you have any issues, please contact Mrs. Santos, North Elementary School's technology specialist.
